

Announcing a better MRI: more comfort for you, more clarity for your doctor.

Have you avoided MRI exams because you can't bear spending time in a confined space? Are you simply uncomfortable about the process?

Our new Philips Ingenia 1.5T MR scanner will change the way you feel about MRI. It has a wide opening to help you feel less confined. It can perform routine scans quickly and provides higher quality images.

UBMC is the first hospital to introduce this generation of MR scanner in Utah. We are pleased to offer this advanced technology to our community.

- **Better Image Quality**
- **Greater Patient Comfort**
- **Faster Exams**
