

MESSAGE from the President

“Our mission drives the decisions and investments we make in our community and every strategic partnership we establish.”

*-Jim Marshall,
President & CEO*

Since our meager beginnings in 1944 we have been razor focused on doing all we can to help our community have access to and to receive the very best in healthcare services close to home. At Uintah Basin Healthcare we take this mission seriously. Our mission drives the decisions and investments we make in our community and every strategic partnership we establish. **Our mission is,**

“Caring for our communities through access to compassionate quality healthcare and investing in those we serve”.

You'll notice that we are the largest independent rural healthcare system in Utah. This growth didn't happen by accident, it has been because of an intentional focus of our organization over the last 75 years to put the patient first. As a locally owned not for profit organization, all profits are reinvested in our communities to ensure that we continue to expand needed services to truly help our communities have access to the very best

healthcare has to offer without having to leave the Basin whenever possible. By focusing on our patients needs and working to provide an exceptional service, our growth has continued naturally.

We are very excited for the future. As you'll see in this publication, we have many new and exciting projects underway that will continue to improve our ability to expand new health and healing services to our communities.

Our vision:

Health & Healing
EVERY PERSON, EVERY TIME.

OUR History

Roosevelt was homesteaded in 1905. A physical isolation from the larger communities of the Wasatch Front left local settlers to their own means when they needed medical care. After enduring three decades of illness and injury with home remedies and overworked, scarce healthcare providers, the residents of Roosevelt and surrounding communities became convinced that they needed to build a hospital.

The LDS church worked with community minded individuals to establish a hospital for the region. The church would fund 60 percent of the building if 40 percent would come from local donations. The corner of State Street and 200 North was selected to be the site for the original hospital. Construction of the hospital began in 1939.

The original estimated cost of the facility was \$30,000. Local residents and civic organizations, excited about the prospect of a "modern" hospital, contributed all they could, donating labor and cash to assist in the construction. Fundraisers from bake sales to street dances were held to raise the necessary funds.

Construction of the hospital was completed by 1942. Two more years passed before the new facility could open because there was not enough money to purchase needed equipment. Once again, residents went to raising needed funds for \$20,000 worth of medical equipment.

The new Roosevelt LDS Hospital finally opened its doors on August 14, 1944. A dedication ceremony was held October 20th of the same year.

The everyday functions of the hospital continued to rely on a strong spirit of volunteerism. Patient meals were cooked at the hospital on weekdays, but all weekend meals were brought in by community volunteers. The hospital grounds were taken care of and maintained almost entirely by volunteers. Women in the community took on the endless chore of laundering linens, bed sheets and bandages in an era when almost nothing was disposable. All of this was done by a willing community with no remuneration.

On April 20, 1968, Duchesne County assumed ownership of the hospital and the facility was renamed the Duchesne County Hospital.

On January 25, 1996, the hospital "dba" name changed to Uintah Basin Medical Center. On July 3, 2000, we gained non-profit corporation status. On January 12, 2001, we received our determination letter for 501(c)3 IRS designation. In 2008, the hospital corporate structure changed to allow the organization of the hospital foundation. The corporate name of the healthcare system is Uintah Basin Healthcare with the hospital name remaining as Uintah Basin Medical Center.

The hospital has progressively expanded by adding more locations, physicians and specialties. The objective has been to provide more specialized healthcare services locally so residents do not have to travel long distances to the Wasatch Front when specialized medical services are needed.

Since 1944, we have set out to make improvements in healthcare for Roosevelt and the entire Uintah Basin Region. We are loyal to our community and region, and will continue to strive for excellence in healthcare.

Honoring OUR HERITAGE

\$50,000 Hospital To Be Located On corner of Second North and State Streets

Plans for 21 Bed Hospital Now In Hands of Church Architect; Construction to Get Underway in Near Future

The vacant corner across from the Elroy Wilkins home on Second North and State streets has been selected as the site for the new L.D.S. church hospital which is to be built here in the near future, it was recently announced by Roosevelt stake authorities in charge of the building.

The Roosevelt Stake cooperating with the L.D.S. church plans to build a \$30,000.00 hospital which will contain two or three private rooms, two large wards for medical and surgical cases, a maternity ward, a modern operating room, kitchen, offices, store rooms, etc. It will accommodate 21 patients.

Sixty per cent of the funds for the building are being furnished by the L. D. S. Church. The Roosevelt stake must raise the other forty per cent, much of which is to be in labor.

Plans for the building are now in the hands of a church architect and construction will begin in the next few weeks. Authorities of the stake believe the hospital will be completed by next fall.

In Roosevelt Selected**

First Stage of Hospital Building Nears Completion

Brick Work to be Finished This Week; Steel Window Frames Arrive

The first stage work on the Roosevelt hospital building will be finished about September 5, it was announced today by Memmott and Rasmussen, contractors.

The brick work which has been going ahead at a rapid pace will be finished some time this week. All inside cinder blocks are up and cast stone facing the two entrances on the south and east sides of the building have been set in place. Steel frames for the windows have arrived and will be installed next week it was reported.

First stage work consists of all concrete work, including steps, brick work, all bearing partitions, roof supports and the roof. The second stage of the work will include lath and plaster, flooring, plumbing, electrical work, and general inside finishing.

It is hoped that the second part of the building program can go right on so that the building can be completely finished before cold weather sets in.

**8.24.37: First Stage of
Hospital Nears Completion**

Hospital Drive

Whether or not work on the Roosevelt hospital will be continued this year will be decided at a meeting to be held Friday, November 10, following an intensive drive for funds which was outlined at a meeting of the executive and ward committees last Friday evening. Approximately \$5000 must be in sight by November 10 if work is to continue and that means that every organization, individual and ward must get busy immediately and make plans for raising money. The building must not be allowed to remain open and unfinished a winter.

The Roosevelt ward Relief society whose members will election day dinner and money shower on Tuesday, November 10, at 8 p. m. on Tuesday and all people are urged to cast for the city election, then go down to the ward hall for a or both. Shoppers and people from all the surrounding areas are urged to take care of their business in Roosevelt Relief society hospital by dining with the Roosevelt Relief society on November 10 and if all civic and church organizations their goal, the campaign will be off to a fine

Firemen's Street Dance Nets Hospital Fund \$30.00

In spite of a rain storm in the late afternoon and threatening weather all evening, a gay crowd of young people attended the street dance held Friday evening for the benefit of the hospital. The Roosevelt Firemen's sponsored the affair reporting that the sum of \$30.00 was secured which will be turned over to the hospital finance committee.

A square of Lagoon street was closed off with snow fence used through the courtesy of the state and commission. Music was furnished at a minimum cost by local people, and Jack Lundberg set up the sound system. Ben Fenn, fire chief, was in charge of arrangements for the affair assisted by Steve Bellon, Ed Wiscombe, Floyd Bryce, Ben Ailen, Wallace Timothy, John Johnston, Jack Mohlman and Dick Scholes, firemen.

Friday's affair was the second street dance sponsored by the firemen. Through the dances the firemen's organization has contributed \$80.00 to the hospital fund.

A COMMUNITY EFFORT

Thursday, April 27, 1939

Architect's Draft of Roosevelt Hospital

The community pulls together
to raise needed funds to
continue with construction

Work on Roosevelt Hospital to be Resumed Next Week

Wm. H. Ruppel Named Head of Finance Committee

Work on the Roosevelt L. D. S. hospital building will be resumed next week and work on the second stage of the building which includes plastering, flooring, wiring, installing plumbing and heating and all interior finish will be completed. Remo Memmot and Lewis Rasmussen, contractors, will be here Monday to begin construction operations, members of the hospital committee, who met Tuesday evening, announced.

William H. Ruppel was named secretary of the hospital finance committee to replace M. E. Lundberg who has moved away from the city and a campaign for hospital funds is to get underway.

General Meeting Slated

A meeting of all ward bishops and ward committees has been called for Monday, April 22, when ways and means of raising the funds necessary to complete the second phase of the building will be outlined.

4.18.40: Ready for Phase Two

HOSPITAL SERVICES EXPAND—Facilities of the Duchesne County Hospital continue to grow, as the administration works to serve the needs of the residents of its area. The new building, which was

completed in 1938, is shown here in comparison with the old building (right). After apartments in the new building are rented near full capacity.

24 Years Later... We started on our 2nd home:
Duchesne County Hospital Groundbreaking 7.11.68
Construction Begins 10.10.68, Dedication 9.11.69

Completed Building Awaits Equipment

12.11.41: Construction complete, now to raise funds for equipment.

Finally, on **8.14.44**
we're ready to
open our doors.

CONTINUED
Growth

The Roosevelt Hospital opened its doors to the public August 14, after two years of organized effort on the part of the hospital committee, civic organizations and citizens of the community, with Mrs. Martha Shanks, former county nurse, assuming position of head nurse.

Communittee in charge of the institution includes Ray E. Dillman, president of the Roosevelt L D S stake; Russel Todd, Lee Angus, William H. Ruppel, Jr., and W. H. Morrison. Dr. D. P. Whitmore and Dr. Lurrine Miles also will be directors.

The Roosevelt Junior Chamber of Commerce has been active in landscaping and beautifying the grounds. Approximately 85 truckloads of soil and fertilizer have been hauled to the site and a seed bed prepared for lawn. Necessary materials and labor have been obtained for installing a complete sprinkling system. The club will contact every family in Roosevelt regarding the purchase of a family policy in the hospital insurance plan.

SNAPSHOT OF

Today

2019

Today, Uintah Basin Healthcare consists of:

- Uintah Basin Healthcare Foundation
- Uintah Basin Medical Center
- The Clinic (Altamont, Duchesne, Manila, Roosevelt, Tabiona & Vernal)
- Emergency Medical Services (EMS)
- The Villa (Rehabilitation & Senior Villa)
- Home Care Services (Home Health, Hospice & Medical Equipment)
- Walk-In Clinic & Occupational Health
- Women's Health (Roosevelt & Vernal)
- The Dialysis Center (Roosevelt & Vernal)
- UBMC & DVMC Pharmacies

For this past fiscal year (7.1.18 - 6.30.19):

- We provided \$1,664,322 in charitable healthcare to Basin residents, which did not include another \$9,428,703 in bad debt.
- We were one of the largest employers in the Basin with over 700 employees; paying out \$28,948,462 in wages and \$10,393,531 in benefits.
- We provided \$91,543 to support medical scholarships and local education.

- 57,092 Outpatient Visits
- 1468 Inpatient Visits
- 2596 Surgeries
- 581 Babies Delivered
- 11,403 Emergency Visits

We donate over \$50k annually to local health initiatives, community programs, schools and events.

A highlight of recent advancements...

- 2011: A 37,000 square foot clinic (Clinic #2) is built, allowing the addition of specialty providers.
- 2012: The nursing simulation project begins - which later develops into a partnership between UBH, USU, UBTECH, the Utah Governor's Office of Educational Development and Newfield Foundation. Several phases would follow.
- 2012: EMS adds a new monitor defibrillator device with defibrillation, external pacing, and interpretive 12-lead ECG allowing responders to send test results from the ambulance to the hospital, even before the patient arrives.
- 2012: EMS adds their 6th ambulance to the area of Roosevelt, Altamont, Fruiland, Duchesne and Tabiona.
- 2012: UBMC launches new Corner electronic health record.
- 2013: UBMC adds first-ever digital broadband Philips Ingenia 1.5T MRI (the first to introduce this generation of MR scanner in Utah).
- 2013: UBMC opens new & improved respiratory and sleep center.
- 2014: Brad LeBaron, President & CEO resigns after nearly 21 years of service to move to a new position in Provo, Utah.
- 2014: Uintah Basin Healthcare welcomes new President/CEO, James (Jim) Marshall.
- 2015: The Intermountain Life Flight team is stationed full-time at UBMC, greatly improving patient transports.
- 2015: UBMC announces new tele-audiology program, improving follow-up here at home for newborns who do not pass their initial hearing screening.
- 2015: UBMC opens expanded emergency department, growing from 4,230 square feet to a total 10,180 square feet - offering 2 trauma bays, 5 exam rooms, 2 OB/GYN rooms, 1 isolation room and 1 triage room.
- 2016: UBMC leads the way with Mako™ Robotic - Arm Assisted Surgery for Partial Knee Replacement and Total Hip Replacement procedures.
- 2017: UBMC is the first hospital in the region, and one in only five in the state, to offer Stryker's robotic-arm assisted total knee application for use with its Mako™ System.
- 2017: Staff from Utah Valley Hospital and UBH work to implement TeleNICU Early Lung Recruitment / Resuscitation Program for newborns, leading to a drastic reduction in newborn transports due to respiratory complications.
- 2017: New Infusion Center opens offering soothing patient environment.
- 2018: UBH partners with Healogics, the nation's largest healthcare provider for wound care services - now offering complex wound care and hyperbaric medicine.
- 2018: New Women's Health Center located at 475 N 500 W in Vernal is opened on level 2 above UBH lab and radiology.
- 2018: 3D mammography with patient-assisted compression is introduced, improving quality and comfort.

The old adage "an ounce of prevention is worth a pound of cure" has never been so true regarding the future direction of healthcare. Traditionally we only see the doctor when something is wrong, but far too often this approach leads to poor outcomes, increased healthcare costs and an overall unhealthy community.

The future of healthcare can be summed up in one word: "engagement". We want our patients to be actively engaged in being, getting and staying healthy. Our focus is to keep our community healthy by proactively reaching out to promote necessary preventative care such as: annual wellness visits, colonoscopies, mammograms and vaccinations. Using advanced analytics, we identify people based on their age, gender, lifestyle and/or chronic condition and send targeted communication meant specifically for them. We call this approach "Population Health". For example, if you are diabetic we want you to be in a program where we can more closely monitor items such as diet, exercise and medication adherence; things that help you manage your health. Technology innovations around remote patient monitoring, virtual visits and patient portal will continue to improve access to our services.

As we increasingly transition to this proactive model through engaging patients and couple that with our continued commitment to sponsor events that promote wellness, our communities can fight the cost of healthcare and live healthier, more fulfilling lives.

-Preston Marx, VP of IT

There can be no doubt that technology plays a central role in the delivery of healthcare in the 21st century. Technologies have transformed the way providers deliver quality outcomes to their patients. Other technologies including genetics, artificial intelligence, bioengineering and wearables promise patients the hope of personalized care options and outcomes in the future. In the midst of all of this technology lies a more basic need - the promise of a more personalized human experience when seeking healthcare. Today's healthcare consumer is more involved in their health than ever before. A recent study published by The Beryl Institute titled, *Consumer Perspectives On Patient Experience 2018*, noted:

"This elevating of the conversation to the human experience in healthcare resounds more than ever. Healthcare now seems committed to understanding it must honor both those delivering and receiving care in ensuring the best outcomes that matter. People are not just passive participants in a care transaction or simply recipients of care, rather they are partners in a care conversation, who must be acknowledged and cared for as people in a healthcare experience. These voices, what matters to them and the expertise they bring, regardless of the side of the care equation they sit, must now be part of the overall solution."

We must all be partners in a care conversation. Technology has and always will play a key role in the delivery of healthcare but it must not supplant the human experience. Crafting a great patient experience will be at the heart of future healthcare delivery.

-Bobby Richardson, VP, DON

TECHNOLOGY and Healthcare

“Patients now have access to some of the best diagnostic tools, new and cutting-edge treatments, and a myriad of minimally-invasive procedures resulting in less pain and quicker healing.”

Technology has introduced a massive and welcome change to the healthcare industry. Patients now have access to some of the best diagnostic tools, new and cutting-edge treatments, and a myriad of minimally-invasive procedures resulting in less pain and quicker healing.

Mako robotic-arm assisted partial knee and total hip surgery was implemented at UBMC in 2016. The following year, we were the first hospital in the region, and one in only five in the state, to offer Stryker's robotic-arm assisted total knee application for use with its Mako System.

“Using a virtual 3D model, the Mako System allows me to create each patient's surgical plan preoperatively before entering the operating room. During surgery, I can validate that plan and make any necessary adjustments while guiding the robotic-arm to execute that plan. This is simply transformative technology for total knee, total hip and partial knee replacements,” said Dr. Gordon Olsen, Orthopedic Surgeon at UBMC.

Technology has also given patients the ability to remotely connect with specialists and has increased availability of advanced treatment technologies leading to more immediate care and better outcomes. We believe that being a leader in bringing the latest technology to our patients helps provide the best patient experience in all areas.

For example, UBMC was the second outlying hospital in the State to implement Telestroke (2006). The addition of Telestroke and Teleburn protocols drastically improved the ER experience when the situation calls for such expertise.

In 2012, UBH partnered with Cerner Corporation to introduce a new, secure electronic medical record (EMR) system eliminating the need for paper patient health records. In addition to being a single source of reference for a patient's health information, additional benefits such as the Patient Portal with online scheduling and the ability to view your medical record, lab results, and more... is now available.

TECHNOLOGY and Healthcare

“

Leading
THE WAY

”

In 2013, UBMC introduced the first-ever digital broadband magnetic resonance imaging system: the Ingenia 1.5T from Philips Healthcare. This revolutionary machine was designed to quickly perform high-quality MR scans with a high level of patient comfort, offering reduced exam time and a wide opening to accommodate patients of varying size, age, and physical condition.

In 2015, we announced a new tele-audiology program, improving follow-up for newborns who do not pass the initial hearing screening. A Pediatric Audiologist assists over a telecom system with equipment on site provided by the Hearing, Speech and Vision portion of the Utah State Health Department. This innovative approach more quickly identifies infants with hearing loss and saves travel time for local families.

In 2018, we introduced an innovative TeleNICU Early Lung Resuscitation Program, a potentially lifesaving program that has improved care and drastically lowered the number of newborn transports due to respiratory issues. Affiliated with the Early Lung Recruitment (ELR) & Resuscitation Program developed by leading neonatologists, respiratory therapists and nurses in their field at Intermountain Healthcare's Utah Valley Hospital, the program is showing undeniable success.

In 2018, we introduced the Senographe Pristina™ with Dueta patient-controlled compression from GE Healthcare – the latest in 3D mammography. This movement is about offering advanced comfort, clarity and confidence to our patients by offering the latest technology and improving the patient experience.

In 2019, UBMC is now providing an extra level of support to cancer patients in the Uintah Basin with access to experts in the field of oncology through a partnership with Intermountain Healthcare. Using TeleHealth technology, including high-definition cameras, monitors, and audio equipment, clinicians in Roosevelt can quickly connect with Derrick S. Haslem, MD, and his team of oncology specialists at Intermountain Healthcare 24 hours a day, 7 days a week.

"When considering the best partnership to provide access to oncology services for our cancer patients, it was clear that Intermountain Healthcare's Tele-Oncology program provides our patients access to the largest, most in-depth network of leading cancer specialists in Utah without needing to leave the Basin. Their team of oncologists and advanced treatment techniques produce medical outcomes significantly better than the national average. As a local non-profit organization, it is important to us to make the right investments in strategic partnerships to ensure access to the very best healthcare for our communities" said Jim Marshall, President & CEO of Uintah Basin Healthcare.

Access to high quality healthcare services close to home has always been a key focus of our Mission. We believe that our communities will be healthier if they have access to quality primary care and specialty services without having to travel to the Wasatch Front. We have intentionally made decisions to expand our operations to ensure that access is not a barrier for anyone to receive the healthcare they need.

As we put in motion the phases to build the necessary infrastructure for the future of our organization, an update to our Roosevelt Main campus was a necessary starting point. Although our facilities are in good condition, much of the infrastructure needs to be replaced to support future growth and development of our ever-changing industry. Our planned expansion will provide our patients with a new state of the art Surgery Center, Laboratory, Café, Gift Shop and more. The expansion frees up space in the heart of our hospital that will be retrofitted for the growth of current and future services.

Uintah Basin
Healthcare

ROOSEVELT
Campus

COMING SOON

As a locally based non-profit organization, we believe in holding strong to our mission with a focus of improving access while investing in those we serve.

We are grateful to our community members from all across the Basin and beyond who travel to any of our campus locations to receive care. Twenty five percent of our patient base comes from Uintah County - Therefore, we realize the importance of improving access and quality service to the Vernal area.

Our Vernal campus addition will offer new expanded physician office space, radiology & laboratory services, urgent care, a small café and more. The expansion also frees up room in existing buildings to allow for future growth of other services.

In addition, we are excited to announce that with further development of this campus we will be relocating our Vernal Dialysis Center to this campus to better serve our dialysis patients.

Uintah Basin
Healthcare

VERNAL
Campus

COMING SOON

“I’ve always thought of myself as a farm boy who was lucky enough to make it through med school. I knew I was going to be a country doctor. That’s all I ever wanted to be.”

Legacy

HIGHLIGHT

Dr. Terry Buxton

Terry Buxton, MD joined the Roosevelt team in 1963, joining Dr. Rudolph Vernon “R.V.” Larson. (Dr. Paul Stringham had vacated his office 18 months prior after serving Roosevelt from 1950-1962. He then served in Vernal until his retirement in 1989.) R.V. Larson had been practicing in Roosevelt for 17 years when Dr. Buxton arrived, and was a respected member of the community. Dr. R.V. Larson later passed away in 1967.

After R.V.’s passing, Dr. Buxton told the people of Roosevelt, “I can’t stand it here alone with two practices to take care of”. With all the community leaders from Roosevelt and Duchesne, they “wined and dined” Frank Madsen, MD (an outstanding physician that Dr. Buxton was familiar with from the mission field and medical school) at the Hotel Utah Skyroom to convince him to join the practice. Soon Dr. Madsen and “Terry M. Wildhorse Buckskin” – a nickname given to him by his new partner, were in business.

The following year in 1968, the duo welcomed Gary White, MD. Dr. Madsen and Dr. White had been classmates, and all three had trained at LDS hospital and had associates in common. The trio built a clinic by the hospital in 1970 which became a Roosevelt landmark for over 30 years. They rotated a heavy schedule until years later when gradually, three more physicians joined (Drs. Condle, Shupe and Seal) and specialists were recruited by the hospital, lightening their load. Dr. Frank Madsen passed away in 1976.

When asked what it felt like to be such an icon in the Basin, Dr. Buxton replied, “I cared about the people, about my patients. I suppose that I’m very thankful that I could do what I did... I don’t think I’m a heck of a lot better than anybody else for doing it. I just did it because I loved them”.

AN ICONIC TRIO:

Dr. Terry Buxton, Dr. Gary White, & Dr. Frank Madsen

Legacy

HIGHLIGHT

Dr. Gary White

Gary White, MD joined the Roosevelt team in 1968, welcomed by Dr. Terry Buxton and Dr. Frank Madsen in rural general practice.

The doctors' schedule was full to say the least. They ran the Roosevelt Medical Clinic 6 days a week. A typical day started at 7 am, with clinic until 7-8 at night, while still covering ER 24/7, emergency surgeries and baby deliveries through the night. In the morning, they would start with surgery then go to clinic to start another day.

"Weekends, the doc on call Friday was on call all Saturday and Sunday, too, then did surgeries and ran his share of clinic on Monday. We were only off call every third day and every third weekend" said Gary White, MD.

This dedicated schedule went on for years. It wasn't until 1985 when the hospital took over provider recruitment adding more physicians and ER specialists to provide some relief that the load was lightened.

Dr. White introduced endoscopy to the Basin in 1974, and has performed over 30,000 endoscopies since then. In 2002, he finally retired to a limited practice with a special interest in GI (gastro-intestinal) problems. He has been practicing over 50 years and continues to find joy in his limited practice - finally having time to befriend and thoroughly instruct patients.

“

We will continue to invest in you to meet your needs here at home.

”

...

We Hear U

The 700-plus members of the Uintah Basin Healthcare team understand our Mission-Caring for our communities through access to compassionate, quality healthcare and investing in those we serve. As we are led by our values of Respect, Integrity, Compassion, and Excellence, we realize that it is only by committing to understand the personal needs of our patients that we can truly provide exceptional healthcare to our friends and neighbors. This commitment is best expressed in the seven principles of our HEALING model:

Our Healing Model

Hello with a smile
Establish trust
Assist with compassion
Listen & respond
Impress with excellence
Notice & fulfill needs
Go the extra inch

What our patients say:

"I cannot say enough good about the staff and the environment that UBMC provides. I am extremely blessed and lucky to have had such amazing help that day. I am forever grateful for the doctors and staff."

-McKenzie M. -Vernal

"Our experience at UBMC was amazing thanks to these great people."

-Sarah L. -Vernal

"UBMC is by far the most knowledgeable, devoted and caring facility I have ever visited. Thank you seems so diminutive for the gratitude we have for each of you. God bless."

-Kari F. -Visitor

"I felt as though they cared more about me as a person than as a patient... not only caring about fixing my health, but making sure I was ok with a ton of stress and a ton on my plate like everyone else that week. This was a WOW experience for me."

-Tyson S. -Roosevelt

"We were greeted with a smile and with care and concern. That is something that cannot be faked... we were treated like people, not just numbers; that is rare these days. Please don't lose your small town charm."

-Kevin & Laura C. -Payson

MESSAGE from the Board

**“ We honor
our heritage
and the many
legacy figures
who built our
foundation. ”**

*Bob Gilbert
Chairman
of the Board*

Fun Fact: Our Board President was born in 1953 in our original hospital building located on 26 W 200 North in Roosevelt, Utah.

Serving as Chairman of the Board of Trustees for Uintah Basin Healthcare is an honor. Uintah Basin Healthcare is your locally owned hospital, led by a Board of Directors and a dedicated leadership team who together make decisions based on what is best for our community here at home.

We honor our heritage and the many legacy figures who built our foundation. This organization is truly a result of selfless individuals in a community like no other. Brick upon brick, year upon year, dedicated individuals have committed their time and efforts to ensure that residents of the Uintah Basin have access to high quality healthcare services close to home. Our mission has remained the same throughout the years: we focus on providing compassionate, quality healthcare while investing in those we serve.

Every decision we make is based on our values (Respect, Integrity, Compassion, Excellence) as we strive to uphold our strategic pillars focusing on the patient experience, our people, and performance excellence.

As a 501c3 Not for Profit organization, all profits of our organization are reinvested in our local community in terms of equipment, technology, facilities, donations, charity care, and other areas.

Uintah Basin Healthcare provides over \$1.6M annually in charitable healthcare to Basin residents. We are one of the largest employers in the Basin with over 700 employees. We provide over \$90,000 annually to support medical scholarships and education. We proudly support community programs, wellness objectives and events. These are a few things that make having a locally owned hospital who truly invests back in our community so great.

Adding service lines such as Teleoncology, moving forward with the upcoming facilities expansion projects in Roosevelt and Vernal - these are the latest advancements that show our commitment to investing in those we serve and meeting patient needs. We hear you, we listen to your needs, and we take action.

Thank you for your continued support.
